

JEAN PIERRE AESTHETICS & SPA INC

OCTOBER IS FACIAL MONTH

A RELAXING FACIAL TREATMENT

One of the best ways to prepare your skin for winter is to have your skin exfoliate professionally. However one could opt for DIY at home. Super hydration of the skin is paramount following exfoliation.

Fall is a time of change and as the season changes so is the need for change in our daily skin and body care routine. Summer holiday, time at the beach, pool parties and going to the ball park with children, friends and family can cause a lot of build-up of dead skin cells over the summer months, and particularly if your skin is oily, acne, combination. These skin types require more exfoliating while the dry skin will require super hydration to prevent premature aging. Oily skin allows dead cells to adhere to the surface making breakouts more obvious and bothersome.

Microdermabrasion: This treatment gently exfoliate over six layers of dead cells from the skin leaving skin renewed and healthy and ready for hydrating treatments, creams and serums. However depending on the condition of the skin a series of 6 treatments may be necessary and can be purchase in a package. Generally the client pays for 5 treatments and gets the 6th treatment Free.

ANTIAGING FACIALS: The ultimate anti-aging facial is design to replenish the skin with introduction of collagen, elastin, pentopeptide-4 hexapeptide-3 hyaluronic acid, Lipsones, Vit B3, grape seed, ginger root extract, green tea extract, cucumber, and aloe.

There are varying ant aging facials and all facials are customized designed to the individual client and skin needs.

The fact that our skin goes through many changes during the fall, which will likely cause our skin type to change It is necessary to have the skin reanalyze in order to have the right treatment and change of home care products.
